

ALLIANCE
for the Chesapeake Bay

STORMWATER TECHNICAL ASSISTANCE FOR VIRGINIA TOWNS

In 2025 the Alliance for the Chesapeake Bay will provide free stormwater technical assistance to towns or municipalities interested in addressing local stormwater issues. The Alliance will work with participating localities to:

- Assess stormwater issues on public property
- Create a Green Infrastructure Action Plan that summarizes potential stormwater mitigation projects and suggested next steps
- Provide a list of potential funding sources for green infrastructure implementation
- Connect towns with potential implementation partners

All Virginia towns are encouraged to apply. Priority will be given to smaller communities with limited resources.

Use the QR code to fill out a short interest form to be considered for the program
